LANCER EUROPE

Beverage Technology at its coolest.
Lancer Europe. The coolest beverage technology on the market.

Lancer first pioneered advanced beverage-dispensing equipment over 40 years in San Antonio, Texas and became one of the industry leaders.

Four decades later the name Lancer is synonymous with the very best in beverage dispensing systems featuring ingenious design, quality durable materials and ease to use. Whether it’s our top-selling Ice Beverage Dispensers (IBD) or our patented valves, we have achieved worldwide recognition as a provider of optimum beverage dispensing solutions.

Our products record of satisfying customers’ needs and catering for and their demand earned us our global reputation.

But what really solidifies and maintains that reputation is our passion for innovation, our engineering expertise, our product reliability and the fact that our premium products consistently exceed client expectation.

Our expertise lies in delivering unrivalled beverage dispensing systems that guarantee customers can serve the coolest of drinks while pumping up their profits. Our expertise explains our impressive track record and has led to Lancer becoming recognized as a leader in the beverage dispensing industry.

Some of our latest product introductions

- **Smart Cart** – this light mobile multi-purpose drink distribution unit can be deployed anywhere. Solidly constructed yet light and easy to handle, it serves soft drinks in premix or packaged format and can serve fast flowing draft beer and even warm food. Snap frames also allow merchandising signage to be instantly attached or changed.

- **The FBD 352 for Frozen Carbonated Beverages** is the most compact Frozen Carbonated Beverage unit available. This next generation platform is the ultimate unit for dispensing perfect FCB with consistently high overrun.

- **The ‘Artica’** handles all your un-carbonated frozen beverages dispensing needs with ease. This fast freezing and high volume unit - is compact and attractive. Its Turbo Cooling Circuit considerably reduces freezing and recovery times. Extremely versatile, the Attic dispenses quality frozen coffee, slush, energy drinks and shakes.

- **The ‘Unicorn’** tower re-invents the bar gun as a beautifully crafted eye level dispenser. Its self-contained, sleek design creates a small footprint with flexible clamp-on or through bar mounting. The Unicorn handles up to four brands with carbonated water and with volumetric technology.

- **You will always find enough counter-space for the ‘Flavor Craze’, which is the smallest footprint 6-Flavor plus soda plus water Tower on the market. Also available with flavor shot capability by reducing the number of main brands.**

- **Coca-Cola Bottlers will be able to ‘Future Proof’ their assets by replacing their existing R134a refrigerated Lancer beverage dispensing equipment with Lancer CO2 refrigeration decks, which are currently under development. Lancer’s unique lift-out refrigeration deck, now offers the substantial benefit of easing the changeover to CO2. It reduces cost because only the refrigeration deck needs to be changed, instead of the complete unit.**

- **The clever ‘Easy Tap’** Fast Pour Beer dispense tap will greatly simplify your beer dispense operation. Mechanically operated, its effectiveness is astonishing. Singlehandedly operated it fills a pint, with pre-set foam control, within 6 seconds. Easy Tap can be retrofitted onto any existing dispense font and system.

- **Magnum 4- and 6 flavor Barguns** ensures drinks meet Coca-Cola drink quality standards. The key to this innovative step-change is the patented recirculation to the dispense head in combination with ceramic flow controls. Available in different lengths, including a tailor-made holder, they are rapidly changing the nature of barguns. Much to the delight of both bar-owners and consumers.
LEV Lancer Electric Valve

**LEV, Lancer’s State of the Art Post Mix Valve.**

The Lancer Electric Valve is built with the highest quality materials and advanced technology providing our customers with consistent drink quality.

**Features:**
- The LEV is a very easy to install post mix valve.
- Lancer Electric Valve flow rates are adjustable by means of Ceramic Flow Controls.
- Model 100: 3.0 Flow adjustable from 44 ml/sec to 88 ml/sec of finished drinks.
- Model 145: 4.5 Flow adjustable from 74 ml/sec to 148 ml/sec of finished drinks.
- Restricted flow adjustment plug option: Model 100 59.2 ml/sec
- Model 145 97.7 ml/sec.
- Allows easy field repair and adjustment.

LVV, Lancer’s ‘Best in Class’ performance.

The Volumetric Valve is built with the highest quality materials and advanced technology providing our customers with consistent drink quality.

**Features:**
- Over 500,000 Lancer Volumetric Valves in the market.
- Lancer Volumetric Valve is the only market proven valve in the industry (10 years).
- Reduced service costs (no rebrixing), once set, no adjustment, tamper proof.
- Lancer Volumetric Valves using volumetric metering give accurate ratio over life of valve.
- A Lancer valve designed for Coca-Cola to be the benchmark for other valves.
- Designed to insure ratio stability working at fluctuating flowpressures of water and syrup.
- Allows easy field repair and adjustment.

IBD 4500 Ice Beverage Dispenser

Customizable, efficient, and profit producing.

The IBD is Lancer’s no. 1 selling self-serve dispenser. Hard-plumbed syrup and water lines deliver excellent ice-cold drinks thanks to Cold Plate Technology. Versatile valve configurations and a portion-control option allow for easy beverage cost monitoring. Topped with a compelling wrap-around display, the IBD is a favorite of our customers.

**Features:**
- Industry standard platforms in 22 inch - 6 valve, 30 inch - 8 or 10 valves, 44 inch - 12 valves lever or push button dispensing versatility.
- Illuminated interchangeable front graphics, standard fluorescent 15 watt light bulb.
- Visual low-ice indicator lights up to alert the need for ice in the dispenser bin.
- High-capacity drip tray to handle customer ice and beverage over-fill helps avoid safety hazards and drink station clean-up from spills.
- Unique hex-drive ice agitation and dispense drive system for trouble-free operation and long service life.
- High-capacity ice storage bin.
- Multiple valve configurations available for self-serve and portion control operation to control beverage costs.
- Heavy Duty Stainless Steel construction, exterior and interior
- Fully insulated storage bin and drip tray controls condensation and helps avoid moisture related safety hazards.
- Plumbing access front and rear for installation flexibility.

IBD 30 Without Coldplate

Customizable, efficient, and profit producing.

The IBD is Lancer’s N°1 selling self-serve dispenser now also without Cold Plate to be installed with remote cooling. Hard-plumbed syrup and water lines deliver excellent ice-cold drinks because of soda recirculation up to the valve entrance. Versatile valve configurations Plain Water, Soda Water and a portion-control option allow for easy beverage cost monitoring. Topped with a compelling wrap-around display, the IBD is a favorite of our customers.

Features:
- Industry standard platforms in 30” width - 8 valves, lever or push button dispensing versatility.
- Illuminated interchangeable front graphics, standard fluorescent 15 watt light bulb.
- Visual low-ice indicator lights up to alert the need for ice in the dispenser bin.
- High-capacity ice storage bin.
- High-capacity drip tray to handle customer ice and beverage over-fill helps avoid safety hazards and drink station clean-up from spills.
- Unique hex-drive ice agitation and dispense drive system for trouble-free operation and long service life.
- Multiple valve configurations available for self-serve and portion control operation to control beverage costs.
- Heavy duty stainless steel construction, exterior and interior
- Fully insulated storage bin and drip tray controls condensation and helps avoid moisture related safety hazards.
- Plumbing access front and rear for installation flexibility.

Stainless Steel MVU Dispensing Tower.

The Lancer new Flavor Craze Tower is an ideal way to offer customers a flavor shot capable dispenser in a very small footprint. It is a small Multi Valve Unit with one nozzle, the state of the art technology is made with the highest quality materials and provides a unique drink experience. The tower not only offers the possibility of adding Flavor Shots to your drink, it also gives the possibility to choose between carbonated or non carbonated drinks.

Features:
- Multi Valve Unit expands brand variety to six dispensable flavors in the same space as two LEV’s.
- Hard plumbed stainless steel tower (SS tubes).
- All-stainless, highly cleanable surfaces with no exposed insulation.
- Island based dispensing tower.
- Designed for easy installation.
- Standard high quality LEV flow control technology.
- Programmable Portion Control with top off option.
- Shot size programming.
- Keylock switch.

Good things come in small packages.

Red 1, Lancer’s newest cold carbonated dispenser, is a state-of-the-art counter electric dispenser (CED) that is designed for the International market. Don’t let its size fool you; it’s power-packed with great features.

Features:

• Occupies a small area of counter space - only 343 mm (13.5 inch) wide.
• This small footprint is ideal when faced with space constraints.
• Extreme durability with all stainless steel cabinet, water bath, product lines and refrigeration deck.
• Available with five post-mix dispensing valves.
• Center valve features 3-way back block providing changeability from plain water to carbonated beverage without depressurizing system.
• Lancer's patented valve technology ensures consistent drink quality.
• Coca-Cola Sales Equipment Certified.
• The removable refrigeration deck provides easy maintenance.
• Earth Friendly - completely HFC-free insulating foam; Zero Global Warming Potential; Zero Ozone Depletion Potential.
• Reduced energy consumption by 40 % with Lancer’s exclusive Timed Agitation.
• Uses R134A refrigerant.
• Available with or without Mini-Pumps.
• Sleek, smooth appearance.

The Lancer Green Solution.
A plug and play solution to refrigerant problems of the future.

- The Lancer R&D department has developed a CO₂ deck in line with recent environmental announcements.
- Thanks to the unique Lancer feature of the interchangeable cooling deck working dispensers can be field retro fitted with a CO₂ cooling deck.
- A simple operation that takes not more than one hour.
- The Lancer replaceable deck reduces the cost of moving to environmentally refrigerants such as CO₂.
- By replacing the existing deck by a CO₂ deck, one can save the cost of renewing the dispensing part of the equipment.

蓥 The CO₂ Compressor Deck concept.
Simply replace the old deck with a Lancer CO₂ deck. Leaving the dispensing equipment as it is.
A simple cost and time saving operation.

Specifications
Refrigerant
- CO₂: 511 gram / 18.02 oz.
- ELECTRICAL: 230VAC / 50HZ.
- ICE capacity: 23 kilo / 50.7 pounds

Lancer introduces the Recirculation Bar Gun.

- Meets Coca-Cola ratio standards for all current and new HCYS syrups at 44 ml a second finished drink flow.
- Every Flow Control Module is tested and guaranteed to meet Coca-Cola ratio standards.
- Ratio control from the front of flow control module allows much easier access.
- Any flow control module can be easily changed in the field to fix orifice.
- Tubing is all one size with larger ID than competition.
- Tubing will not transmit pungent flavors to adjoining tubes.
- Removal and re-installation of bottom plate on handle does not cause spring assembly to pop out and be lost.
- All push buttons are interchangeable with competitors.
- Improved nozzle assembly ensures no flavor carry-over, good finished-drink stratification and carbonation.
- Bar gun can be field converted to have one or more juice selections.

Recirculation 4 Flavor Bar Gun Hand Grip.

A well designed construction makes field repair or adjustments very easy.

Recirculation 4 Flavor Bar Gun Flow Control Unit.

Valve assembly can be removed from the Flow Control Module without depressurizing the system.
